Job Title: Assistant Manager-Intern

CTC-Upto Rs. Five Lacs per annum

Location: Delhi

Selection: through interview at Delhi

Sub: Join as Intern, get company paid training, work hard, be loyal to company, get venture funding, launch your own biofuel company and become a Director

About company:

Growdiesel is India's No.1 renewable oil & gas organization dedicated to the cause of environment, energy & empowerment of fuel farmers. The main objective of Growdiesel is to establish a value chain for production of sustainable biofuels from non-food feedstocks like algae, biomass & waste. The main achievements of Growdiesel include:

- 1- Development of a proprietary technology for production of Biodiesel from high free fatty acids (ffa) multiple feedstocks.
- 2- A detailed techno-economic feasibility study cum DPR for Indian Railways to cultivate 40000 Hectares of its spare land with Jatropha, convert Jatropha oil to biodiesel & use the biodiesel to run rail engines (estimated cost of project over 2 Billion US\$).
- 3- Development of a low cost Algae farming systems for producing Biofuels.
- 4- Development of a process "To convert Sunlight, non-potable water, all kinds of wastes and CO2 to Sustainable carbon negative Growdiesel NextGenFuels™ such as renewable cooking gas, Hi-cetane Green Diesel and Aviation turbine fuel".
- 5- Development of compact & efficient advanced reactors for production of biofuels. The commercial scale reactors were successfully deployed at Delhi Secretariat in India for conversion of waste to biofuels.

Petroleum gets formed by the compression of fossil and all types of materials like algae/ biomass/mixed waste over millions of years. Growdiesel has developed cutting edge technologies, equipment *and catalysts* to do it in *minutes*. Growdiesel is now establishing modern manufacturing facilities to produce advanced renewable cleanfuels known as *Growdiesel NextGenFuels™*. These include renewable cooking gas, green premium diesel (a substitute for conventional diesel) and green Aviation Turbine Fuel (a substitute for petroleum jet fuel). The biggest USP of *Growdiesel NextGenFuels™* is that they are Drop-in

Fuels it means they can replace fossil fuels in existing engines, vehicles, equipments and entire existing petroleum infrastructure without any modifications.

We shall provide training & internship in *"The secrets to produce Growdiesel NextGenFuels™"*. On successful completion of the practical training by implementing one project from concept to commissioning you shall get the designation of Assistant Manager-Project. If you are passionate, ethical, hard-working and ready to gain invaluable training and experience, you can look forward to a bright career in this upcoming mega industry.

About intern to director Job profile:

Growdiesel is pleased to launch a business incubator and platform for supporting entrepreneurship in trillion dollar renewable oil and gas sector.

For the selected candidates, Growdiesel will teach the secrets to produce renewable cooking gas which is a replacement of commercial LPG/diesel/natural gas using its proprietary technology, proven equipments and bio-catalyst. The quantum of investment by trainee is just to join Growdiesel with all the positive traits and become a trustworthy intern of the CEO. Each trustworthy intern can become a director and reach a CTC of up to Rs. One crore per year within ten years from the time they complete their training by SUCCESSFULLY implementing one project from concept to commissioning and sincerely follow the Growdiesel ongoing training and support system.

Growdiesel is set up to improve the odds of success of youngsters who wish to become successful. It aims at energising the start-up ecosystem in the country by incubating ventures in upcoming renewable oil and gas sector. Growdiesel Ventures owns scalable, disruptive and technology-led business ideas in renewable oil and gas sector for the benefit of fresh technocrats, budding entrepreneurs and professionals with entrepreneurial aspirations.

We are interested to recruit and train passionate female candidates in *"The secrets to produce Growdiesel NextGenFuels™"*. The internship shall be for duration till they complete one project from concept to commissioning. The selected candidates shall get the designation of **Deputy Manager-Project** with attractive CTC and performance-linked incentives. If you are passionate, ethical, hard-working and ready to gain invaluable training and practical experience, you can look forward to a bright career in this upcoming mega industry. Limited vacancies are available at Growdiesel. In case you are interested to build an exciting career in 100B US\$ biofuel sector, please apply now.

Growdiesel is offering training, internship and practical project modules in discipline of biofuel, renewable energy and environment for young candidates. The company has all required infrastructure and excellent facilities for students to pursue their training and practical experience needs. Growdiesel brings together electrical, civil, computer, mechanical, biotechnology, environment, chemical and all other domains in stimulation and nurturing environment for the development and training.

Sincere candidates shall get assured job according to our company norms, terms and conditions. For any query related to training and project you can directly contact us by e-mail at hr@growdieselmail.com.

Benefits of getting training from Growdiesel:

- Currently no institute/university is providing Carrier oriented training in this fast developing Biofuel sector.

- At the time of joining Growdiesel, the candidates shall get instant opportunity to start their career in biofuel sector.
- Growdiesel is also providing venture capital to youngsters who are honest, trustworthy and who have completed their training and got a practical project management experience at Growdiesel.
- Training shall provide golden opportunities' for candidates all over the world.
- Growdiesel Certificate shall be given to all the candidates who successfully complete the practical training by establishing one project from concept to commissioning.

Why join Growdiesel:

- To optimize knowledge and skill development in biofuel sector
- To meet corporate world and attend various national seminars and conferences
- To channelize efforts in right direction and develop practical management skills, which are better than even an MBA degree
- To be out performer from day one when compared with your classmates or seniors
- To gain valuable practical industrial experience

Limited vacancies are available. Selection shall be through face to face interview. If you are interested, pl send your latest CV with passport size photograph and scanned copy of latest degree to hr@growdieselmail.com. Thereafter, we shall invite you for interview at our Delhi office.
