Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Technical 1 - focus was on resume. A short discussion on my minor projects. 2 puzzles. 1 coding question (only approach was needed)

Technical 2- again we started from my resume, then to the projects i did in sem 5&6. A puzzle based on mathematical operations. Anything or any project dknr apart from curriculum.

HR - tell me about yourself. My background (about parents and their jobs). How much do i expect(salary).

Biggest achievement. Am i comfortable relocating to Hyderabad office.

At the end of each round they gave me an opportunity to ask any question.

.....

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

First round was a online aptitude test. It mainly had logical reasoning and data interpretation questions and some basic quantitative aptitude questions like P and C, work time etc.

This round was followed by a video HR round in which we had to make a video of our responses and that was submitted. It had basic questions like strength, weaknesses etc. This round also had one or two guesstimate questions.

Then on the day of the campus drive, there was a case study round which had a case study with 4 questions (2 qualitative and 2 quantitative) .30 minutes were given to solve the case study after which we had to discuss our solutions with the interviewer. After that the interviewer asked a puzzle.

Next round was the HR plus resume probe round. Basic questions related to resume and HR questions were asked. The interviewer also asked a puzzle and some graph related questions and that was it.

How many rounds were there in the interview process?

4

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Round 1: Aptitude test by AMCAT. Typical verbal, LR/DI, Quants questions.

Round 2: GD: It was a case study based GD where we were given 5 mins to read the case study and 15-20 mins for discussion and conclusion.

Round 3&4: Both the interviews had a mixture of technical as well as non tech questions, largely non tech.

Q1. Which is your favorite company and explain the risks involved in that?

Q2. General questions about hobbies, favorite subjects.

Q3. There was a very long discussion on article 370 as I mentioned that I have a keen interest in politics.

Q4. Questions like 'where do you see yourself in next 5 years?' were not asked directly, however in-between a conversation they were asking such questions to see if you're being honest.

Q5. Do you have any questions for me? This has to be the most important part as I feel they were heavily assessing candidates on their spontaneity and calmness. Do ask intelligent and relevant questions.

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

1st online round- Online coding test on Hackerrank platform with various sets of questions focusing on graphs, dp, trees etc.

2nd online round- Another online coding round for the applicants who cleared the first round.

3rd round- It was a 15 mins pen/paper test. A question based on graph data structure was given. We had to write a working code for it.

4th round- Face to face interview where 3 questions based on ds/algo were discussed based on topics like linked list,trees etc. We had to write a working code for all the questions. Also a brief discussion on the question given in pen/paper round was done.

5th round- HR round.

3
.....

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

1.Given a string s1, we may represent it as a binary tree by partitioning it to two non-empty substrings recursively.To scramble the string, we may choose any non-leaf node and swap its two children.Given two strings s1 and s2 of the same length, determine if s2 is a scrambled string of s1.

2.You have to LinkList L1 → L2 → L3 → L4...LN.You have to convert it into L1 → LN → L2 → LN-1....

3.We are given a read only array of n integers. Find any element that appears more than n/3 times in the array in linear time and constant additional space. If no such element exists, return -1

Technical Round 1:-The interviewer went through my resume and we had a long discussion on nodejs,like what is nodejs ,is nodejs single threaded,architecture of event loop and thread pool in nodejs.he told me to write a basic server code and create get and post request.He asked me about component lifecycle and then he asked me to write code of a react app,in which on clicking button will display current time.Then we moved to data structure and algorithms. The first Question he asked is to optimise $(a^b) \bmod c$. Then he asked a question which was to find longest length of island in 2-d matrix. After that he asked some questions from sorting. After that he asked me to write code to check if tree is bst and to find LCA of 2 elements in tree. This round lasted for 1 hour.

Technical Round 2:-

In this round I was asked

Imagine you have a dictionary

You need to find the list of all words which are compounds words

moonlight = moon + light

the dictionary needs to be traversed and you need to figure out all such words

. After these two questions he asked me about my projects and the schema design on those projects,my summer internship and what I did there.He asked me about my GSOC journey and also asked me to explain some of my commits on org's repo. After that he asked me to design code for this problem.

You need to design an efficient elevator system. Think over it. And take test cases.

How many rounds were there in the interview process?

3

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Round 1: Online Aptitude Round.

It consisted of general aptitude questions with weightage on logical reasoning followed by quantitative aptitude. The english section consisted of comprehension passages, fill in the blanks (based on tenses and parts of sentence), and other multiple choice type questions like choosing synonyms.

Round 2: Technical Round 1

It was conducted via Skype in college premises on our own laptops. Most questions were based on finance but they were easily manageable with presence of mind and some logic. Puzzles and Guesstimates were also asked along with some HR questions in this round.

Round 3: Technical Round 2

It was similar to Round 1 and consisted of puzzles and guesstimates for the most part. Both the rounds had HR questions incorporated within them. I would recommend acquiring some knowledge of current affairs revolving around financial news in the country and the economics behind it to ensure that this round goes well.

I would also suggest that you prepare your resume well and have good answers for HR questions like - Why do you want to join finance field? Why do you wish to join TresVista? And other general HR questions

How many rounds were there in the interview process?

1
.....

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

- 1) Round 1(Online Test) - Section 1 - Aptitude :- Questions asked were a bit different from the standard aptitude. Pattern based and verbal questions, not a single question of Quant.
Section 2 - Technical :- Most of the questions were from the basics of the subject - Telecommunication and Systems and some were off the course.
- 2) Round 2(GD) - It will happen! though it was not mentioned in the mail but it is certainly the part of their process. We had to decide the topic on our own, as a group but this may vary in your case.
- 3) Round 3 - PI(Combined Technical & HR) -
Technical :-
 - > Questions based on the internship and other resume fields to be prepared well.
 - > OSI Model - Thorough knowledge is required. Functions of each and every layer and some practical knowledge will be a boost.
 - > Basics of Mobile Communication, for example, GSM Architecture(to be well prepared), Transition from 3G to LTE and other basic concepts. Cross questioning over the topics mentioned.
 - > I had a publication in IOT, hence a few basic questions were asked, for example, Process of IOT implementation, What is cloud? etc.
- HR -
 - > Why Airtel?
 - > Why Telecom?
 - > What if the task assigned to you is monotonous?
 - > Any questions for us?

TIPS :

- 1) Basics of telecommunications
 - 2) Try to Interact with the person presenting the Pre placement Talk
 - 3) Defending your resume is the key.
 - 4) Try to show your intent towards the field, in this case telecom.
 - 5) If you actually want this job, in ECE core, then surely you'll be tensed but try to control your nerve, specially during the interview.
 - 6) Do ask questions at the end of interview, if allowed to ask.

APTITUDE

In apti round general questions of logical, verbal and quantitative questions were asked. Few general knowledge based questions were also present. Time management is very important in order to attempt the max questions. No negative marking.

TECHNICAL(WRITTEN)

It was a pen and paper test which consists of 5 questions. First question based on mysql having 3 parts in it with moderate difficulty including topics like joins, group by, having clauses and few other mysql functions used in it. One question was of binary tree (least common ancestors). Other two were of ds algo implementation.

TECHNICAL INTERVIEW ROUND 1

Firstly they asked from my resume related to the summer internship and projects.

Asked find the middle element in a linked list then find the kth last node from end in a list. 3 more questions directly from gfg related to arrays.

TECHNICAL INTERVIEW ROUND 2

Questions related to mysql and the questions asked in the written exam.

Round 1 - online aptitude+ 2 coding questions Questions were easy . Count the occurrences of all elements in an array which are odd at odd index and even at even index.

Second question was given a date month and year you have to tell what day it is on that particular date.

Round 2- Technical round 1-

basic questions like tell me about yourself,how is college life etc.Also asked about my projects and technologies i was working with . Then asked about DS and algo. questions on circular linked list, sorting,searching,detect loop in linked list etc. had a long discussion on college life and environment around . Also asked small questions like difference between pass by value and pass by reference, who wrote C language etc. and also logical puzzles were also asked.this was a long round. almost went for an hour and a half or so.

Round 2 - Technical round 2 .

Because my technical round 1 went pretty good and interviewer was impressed he passed on a good feedback. so in this round tech related questions were barely asked. logical questions and what to expect from us etc was discussed and why do you want to join our company .

HR round.

Almost every common hr question was asked like strengths and weaknesses, why do you want to join optum,how would you handle politics within the company,are you ready to work in shift etc.

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

It was on campus interview. There were 4 rounds in total .

1 Online + 2 Technical + 1 HR .

Every round is elimination round.

First round was online on hackerearth and it consisted of 3 programming questions and 10 MCQ questions on DBMS and OS. One programming question was tough and I used BIT in that and others were moderate difficult. It was around 45 min long.

Second round was technical and interviewer asked me 3 programming questions and some DBMS questions.

One question was on Binary Tree Traversal, second was on DP, third was to run Dijkstra algo on the graph he provided.

Third round was on project discussion and interviewer asked me about recent Hackathon experience which I mentioned on resume. It was around 25 min long. They also asked me about Family Backgrounds, Schooling, why do you want to join Delivery?etc

Aptitude

Basic relation questions/ Quantitative

There were a special section of speed test which was to test your speed only basic questions were asked like what is written in the box.

Another section was related to Project Management questions like work breakdown structure, project cycle.

Technical Round

Situational questions thoroughly

Initiatives taken by you? How will you handle the dilemma. Two puzzle were asked one was what is the meaning of (50%+ 10%) discount.

Tell me about a situation where you took an important step to correct things when everything was going wrong?

Are you sure you are not taking a wrong step in choosing the non technical field?

What attracts you in this field?

HR

Basic introduction

situational questions

About your traits

Whether you are rigid or not?

At last I would suggest that go through with your life incidents properly and be ready to quote them under appropriate questions asked

ALL THE BEST!

GD 1st round- We discussed about the Digital India and how it should be promoted effectively.

Personal Interview- Tech +HR

The 1st very obvious question is as to why you want to join Airtel (be honest and straightforward)

Then CV was evaluated and then questions related to telecommunications were asked.

I told them according to my interests I'm looking for a communication field to work in. Questions about communication in general were asked then also I mentioned about wireless comm in particular so the architecture of 4G and other technical questions were asked.

They also asked me if I would be comfortable working in Manesar , Gurgaon .

4

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Technical Rounds: Both technical rounds were online, in the first one they asked to basic vanilla javascript questions and other tricky questions related to development. Asked the details about my projects and how i learnt development.

In the Second technical round i had to write the code of a fetch api call, a Javascript promise and 1 coding question. There was also discussing about web caching and CORS request and HTTP headers.

IN the Machine Coding Round i was given a Search API and i had to develop its frontend form scratch within the given constraints.

The last round was HR round, here i was asked about questions about being a team player, some management questions.

2

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

First was an online round containing aptitude, DBMS, OS and c/c++. It also consisted of 3 coding questions(easy, medium and hard). After that those who cleared online round were called to online tech round 1. It was basically a HR + tech round. I was asked some general questions about what tech stack I use and what role would I like to choose and last the interviewer asked me 2 coding questions. First was to get minimum and second minimum element in an array and second question was to find the maximum product of 2 numbers in an array. Those who cleared tech 1 were called to online tech 2 Interview round. The interview asked me questions from domains including DBMS, OS, MySQL, Python, JS. Then he asked me 2 coding questions. First was to find the median in a running stream of integers and second was to explain in detail the whole working of min heap with implementation.

After this the interviewer asked if I had anything to ask.

This was my interview experience with kuliza.

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

For Innovacer, I had 1 GD round followed by 2 Technical PI and 1 HR interview.

Gd topics were fairly general. The topic for my group was: Major historical or significant events of 20th century.

After the gd, for my first PI, I was asked about my research experience and college projects mainly. We discussed in length my skill set and the instances when I got to use each of the skills that I had mentioned in my resume.

For my second PI, I was asked to explain my research paper and its relevance. Also, I was asked to prove why I would be a better choice for that position and not someone else whom they find fairly competent. I was given hypothetical situations and was asked to assess them and respond in the way I would in an organisational setting.

For my third round, I was asked logical reasoning questions and more questions regarding my co-curricular background.

1st round : Aptitude + Technical online round

Had basic aptitude and reasoning questions and questions from telecommunication networks and optical fibers.

2nd round : GD

It was a surprise GD round. General topics like social media is a curse or a boon and about the current education system.

3rd round : Interview

Technical questions from telecommunication networks and basics of mobile communication.

Questions to explain GSM GPRS and various architectures of 3G 4G.

Questions regarding the things mentioned in the CV and about the summer training.

Prepare your CV well and be prepared for some rigorous grilling....they test your confidence and patience.
Stay calm.

Good Communication skills will always prove profitable.

NOTE: All rounds are the elimination rounds.

First Round was an online test which include Aptitude and 2 questions of coding.

Second round was the general interview related to our resume and our projects.

Third round i.e. the second interview was mainly related to data structures and algorithms. Hashes, maps, array manipulation we've discussed it all. Then they ask me about the project I've done related to game development. Then the interviewer shifted to some general discussion like leadership, teamwork, etc.

Fourth round was the HR round in which the interviewer tested my basic speaking skills, asked some basic HR questions and personal details. TIP: Listen to the ppt presentation carefully. Some direct questions from the presentation can be asked.

None

How many rounds were there in the interview process?

6

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Round 1: Technical/Aptitude

This round was a Google form containing all the MCQs related to aptitude and computer science concepts.

Round 2: GD

The GD was held which was on a very general issue

Round 3: Technical Interview 1

Here I was asked to write code of printing a multi nested list which I did using Python. Then my projects on ML/DL were discussed in brief. After that many questions about Computer Networks were asked.

Round 4: HR

Here general questions about my background were asked

Round 5: Technical Interview 2

Here I was asked to explain my projects in detail to the Co founder of my company and also my understanding of ML/DL and computer networks was tested.

Round 6: CEO round

Here the CEO asked me some questions about how I have handled situations in past and positions of responsibility.

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Round 1

4 sections of Mcq questions (Linux, data science, aptitude and Oops) + programming

Nearly 10% of the total students qualified this round

Round 2

A couple of puzzles followed by Sql (decent level), then they asked Ds algo (easy and medium level)

20/58 cleared this round

Round 3

They asked everything written on your resume, they asked about your internship, projects and every tool and technology written on your resume.

4

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Technical aptitude : java and C mcqs

Aptitude : Logical,numerical and verbal reasoning

Programming round : 4 programming questions have to be coded either in Java or C not even C++.

Technical interview 1 :

- Discussed internship project in detail
- Resume around questions
- Difference between array and hashtable
- Asked about interest in programming.

Technical around 2:

Given a google doc link to solve questions

- 6 Sql queries
 - Programming question : check if a string is a palindrome , without reversing it.
 - Oops concepts in detail were asked. Almost covered all the topics
 - 1 Puzzle
-

.....

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

In aptitude round - There were approximately 60 questions on hackerearth platform and all were mcqs.

They were regarding aptitude and technical aspects.

Then came technical round 1 of interview - All of my questions were based Linux, few on machine learning and 3 questions on DSA. And around 4 questions on Database and SQL.

Then was 2nd round and was managerial round to check my personality. And some kind of pressure handling capabilities.

And last round was HR. It was to check if I'm on track with the company norms and how am I as a person.

No. OF ROUNDS: 5 ROUNDS(1 coding round, Technical Interview 1, Technical Interview 2, CTO Interview, 1 UCAT & Personality & Behavioural Assessments)

Brief Description Of Rounds:

DAY 1

Round 1:

Coding round

DAY 2

Round 2(Technical Interview):

Q1. Are you a day scholar?

Q2. He gave me a list of column names and asked me to apply 1NF, 2NF, 3NF and BCNF.

Q3. OOPS CONCEPT. Tell me about abstraction in terms of coding and how is it useful if you work in a team.

Q4. loosely coupled vs tightly coupled code.

Q5. Tell me about every data structure, when will you use them and why? (starting from the array till graphs)
I explained the different processing complexity of every data structure and their pros and cons over the other. We had a deep and healthy discussion over this question.

Q5. Explain MergeSort and QuickSort. Their best case and worst case.

Give an example of their best and worst cases. Write the code for Quick Sort. How will you optimize it?

Q6. Write the code for "Longest Common Substring (DP)" and its time & space complexities.

Q7. Puzzle Question: You have a plank of a x b dimensions. You have to cut it into 1 x 1 squares. In how many minimum numbers of cut will you do it??

Q7. Explain Knapsack Problem and write its code (Both greedy and DP).

The interview was approx 2 hr long.

Round 3: (Technical Interview):

This interview was focused on my resume and internship.

We had a deep conversation over my internship which was an ML-based internship. what were the algorithms I used? What were the hyperparameters? How was the data cleaned and how did I manage the missing data? Why I did not use the other algorithms? Pros and Cons of different algorithms. What were the various hurdles did I encounter through my internship.

The interviewer has experience of 20+ years and they will even grab your most trivial atrocity.

This interview was around 35 min long.

Round 4: (Interview with CTO)

Round 5:(UCAT & Personality & Behavior Test

Initial screening test is aptitude test consisting of quants, LR questions.

Second test is programming test.

The test had 3 questions the level was intermediate.

After that you get qualified for interviews .

The topics they asked were

DATABASE , OOPS CONCEPT , SOME CODING QUESTIONS WERE GIVEN , SQL queries were asked(join queries are most imp, concept of referential integrity in database) and the language you are proficient in. Prepare your projects well as they are commonly asked.

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

After clearing 2 hackathons (one online and other offline), I gave one pannel presentation of my second hackathon and one technical interview.

The questions asked in pannel presentation were mostly regarding my approach towards the problem; they also asked some basics of machine learning such as logistic regression, classification, correlation coefficient.

The second round was a telephonic interview where the questions asked were based on classification algorithms such as SVM, Naive Bayes, which is better and where. The mechanics of such algorithms. Then I was asked to provide insights for a recommendation system for an e-retailer. Also they asked me about what I know about the company.

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

1. Firstly the Aptitude Round. It was conducted on AMCAT. There were adaptive questions based on your ability of solving them. It consisted of basic questions from Quants, Logical Reasoning and Verbal Ability.
 2. Second Round was the Group Discussion round. Groups of 10 were formed and we were provided with a case study to solve as a group.
 3. Third and Final round was the Personal Interview Round. I had three rounds of Personal Interview. First round was basically technical round based on my subjects in my coursework, guesstimates etc. Second round was Technical+HR, based on coding and projects. And the final round was purely HR based.

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Round 1: Aptitude

Aptitude questions were quite difficult and difficult to manage in the given time

Round 2: Coding round

It consists of 13 questions in 2 hrs. You have to complete maximum and obviously you can't finish all those. I was able to complete 5 questions. All questions were of different marks

Round 3: Puzzle Round

Puzzles were given one by one. Once you complete one puzzle you can ask for the next. Sufficient time was provided but level of those puzzles kept on increasing. Total 4-5 puzzles were given.

Round 4: Interview Round

Based on the puzzle round shortlisting was done. As soon as you are able to complete all those puzzles you were called for the interview and you weren't allowed to talk to anyone before the interview. All shortlisted were made to sit separately.

Interview Questions:

1. Firstly they discussed all those puzzles to check our approach other than that I was asked one more puzzle i.e., Hour glass problem (very simple as compared to puzzles asked in previous rounds)
2. Difference between C and C++
3. Pillars of C++ along with examples
4. Difference between RDBMS and DBMS
5. Then few HR questions regarding preference of location and why
6. Why Vinsol and why this Profile?
7. They also asked about my internship and few questions regarding that

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

22 were shortlisted based on resume for coding Round (90 min).

15 MCQ based OS, CN, DBMS, C/C++, OOPS, aptitude along with 3 programming problems. MCQ were not direct you need to know the concepts involved.

1) Given N dates in the format day/month/year for ex 25 July 2002 you need to sort the dates in ascending order (use of structure and sorting was involved).

2) You are standing at (1,1) in Cartesian plane and point is given (x,y) you need to tell whether it is possible to reach (x,y) from (1,1) you can move only in +X and +Y direction by 1 step at a time.

$0 \leq x, y \leq 10^{18}$. Brute force won't work here(gcd based)

3) Don't remember it was long paragraph but this it was implementation based.

Candidates with 1 complete and a partial question were shortlisted for interview Round 1. Out of 22 only 11 were shortlisted for interview.

Round 1(30-40 min)

Introduce yourself. There are N people whose rank and bidding score are given now suppose some candidate with a particular score arrives you to find its proper position in list of candidates (as given) basically you need to find its rank and then insert it the list and send notifications to all those candidates whose rank reduced by ones. Discussion on which data structure to use and how to insert efficiently along with time complexity, I was supposed to code at google collab.

Q2) Remove duplicate from a given dictionary which contains your name and contact number as key value pair you need to code at google collab. Discussions on resume based projects(minor 1 and 2), questions on MVC , nodejs etc as I did summer internship on backend development and some open ended questions were asked. 9 were shortlisted for Round 2.

Q1) 0/1 knapsack. Greedy and dynamic programming approaches were discussed, need to give code for both top down and bottom up dp.

Q2) sort a list of 0s and 1s with code

Q3) Pattern based question. Other questions were also asked on system design(scaling,CAP theorem) 4 were finally selected.

Was the placement through an off campus drive?

- Yes
- No

If yes, please mention the name of the drive.

.....

How many rounds were there in the interview process?

4

.....

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Round 1 - Resume screening

Round 2 - Online coding test :

A set of 20 MCQs, including basics of DS/Algo, output puzzles, OS, CN, DBMS along with 3 programming questions were given. The test was conducted on platform - Talent Decrypt, duration of test was around 1hr 30 min. Level of questions were easy-medium.

All our interviews were conducted via Hangouts/Skype.

Round 3 - Technical Interview 1 :

This was a quick 20-25 minute round with the CTO. Introductory questions on resume.

Asked about SIH-2019 project i was part of. Questions on what tech stack used & why, how was the problem statement solved - approach and contribution, as well as some technical questions on those frameworks.

Few questions on OS. He gave a simple question to write a program to calculate a given power of a number - explained methods starting from $O(N)$ based iterative/recursive and then optimal $O(\log(N))$ based (<https://www.geeksforgeeks.org/write-a-c-program-to-calculate-powxn/>)

(Be absolutely thorough with your resume)

Round 4 - Technical Interview 2 :

This was around 45-50 minutes long interview process

Given an infinite pyramid of odd numbers

1

3 5

7 9 11

How will you find sum of any given row number?

Given a set of strings, how to search a given string in most effective way.

In a given array with elements having odd occurrences, find a number with even occurrences. (& variations) & several logic based programming questions.

MVC,SQL vs NoSQL, normalization in RDBMS vs sharding in MongoDB, advantages & use cases over one other.

The interviewer was very helpful and focused on one-to-one discussion of the problems posed.

There were few system design type problems, however as i wasn't having much knowledge on the topic it ended as a discussion on possible solutions.

Few case problem of their bidding app like - How can we handle huge number of notifications due to very frequent change in prices etc.

(Do ask a couple of relevant questions in the end)

If yes, please mention the name of the drive.

How many rounds were there in the interview process?

4

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

1st round was an aptitude test. The test comprises of 4 sections including logical reasoning, quants, verbal reasoning and English language.

2nd round was Group Discussion round. The GD was case study based. We were given a case based on our profile.

3rd round was interview round. The interview was a mix of technical and resume based. The interviewer asked questions about my projects and also some on my technical skills. Moreover she asked some questions about myself, my college life, my hostel life, my family etc. She also asked if I had been in a situation and how I faced it.

4th round was also interview round. The interviewer asked a Guess Estimate first to tell the number of cars on road in Noida on a Monday morning. Then she asked some questions based on my work experiences and academics. Later she asked me to tell the difference between this interview and the previous one. She also asked an impromptu question in between to tell any 3 things about red colour. That was all.

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

1 st round was on logical reasoning , English and aptitude nearly 60 questions were there 20 of each section.

It was an elimination round.

2 nd round was of coding round 4 coding questions were there in 1.5 hr

It was also an eliminating round .

3 rd round was high intellectual McKinley round

2 questions were there.

4th round was technical interview

It happened for around 25 minutes.

Questions on arrays, Linked list, sorting and searching were asked

Projects were discussed and internship projects were also discussed.

5th round was HR round , it lasted for around 25 to 30 mins

Questions like what's not about you is mentioned in your resume .

I cleared all the rounds.

And fetch the job.

3

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

First round was online coding + aptitude round, 2 coding questions based on data structures and algorithms were given.

The level of questions was easy-medium.

Second was f2f interview round and was purely based on DS & Algo. 3 questions of increasing difficulty level were given. Concepts used in the questions mainly revolved around arrays,trees,graphs and DP.
Level of questions was medium-hard.

Third round was also a f2f interview round, also revolving around DS and Algo skills along with some questions regarding my projects and internships.

Level of questions was medium.

Online round was mcq questions which were mostly on geeksforgeeks.

First was a Group discussion on social issues topics.

Then there was a technical round which focused on projects and basic data structures. I was asked in and out about my project.

After this was a HR round with basic HR questions like strengths and weaknesses etc.

Then after 2 days was a telephonic round which again focused on projects strengths and weakness.

Final was a CEO round at their office and he asked personality based question.

1st Round - Coding

3 coding questions (focused on graphs) and some MCQs related to programming.

2nd Round - Technical Interview

Completely focused on data structures and algorithms.

Level Order traversal complete code.

What is favorite data structure and why?

How maps, vector and other data structures are implemented.

Some array and mathematics related problem solving.

About my experience as head of hub in college.

Many more questions on how different data structures work.

3rd Round - Technical Interview (at company office)

Basic linked list reversal code.

Why are you interested in this profile and company?

What is polymorphism and some other basic OOPs concepts.

Explanation of projects mentioned in resume.

4th Round - HR (at company office)

About me and my family.

What you do in your free time?

About likes and dislikes.

What is your goal in life?

Why Kritikal?

How many rounds were there in the interview process?

6

Please describe in detail the questions asked in each round in the box given below. *

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Round 1: Coding

As the title says, this round was of general coding. I was asked to optimize a python script by rewriting some of the functions. I suggested many approaches, finally he was satisfied with the last approach and asked me to code the same.

Round 2: Technical Troubleshooting

This round was a little difficult as compared to the previous one. The interviewer covered various topics like Databases, Operating Systems, Linux and Computer Networks in depth. One should be very fluent with Linux and Networking to crack this one. The interviewer focused heavily on Linux in this round. She also discussed my Google Summer Of Code project.

Some example questions:

Explain shell globbing.

The server is under high-load, Find the issue while explaining your thought process in parallel.

Performance analysis in Linux.

OSI model in depth.

Round 3: Web Technologies

HTTP vs HTTPS.

SQL vs NoSQL.

System design.

Linux commands.

Round 4: Googleyness and Leadership

I was presented with situations like "tell me a time when..", this round was more of a discussion rather than an interview. It's basically a behavioral round so I was asked questions like what are my expectations from working at Google, what criteria do I use to prioritize projects, etc. This round was meh as I don't have a lot of work experience, so I was only able to give slightly vague answers to the questions.

Round 5: Additional Interview

This interview was conducted 4 weeks after the onsite. The interviewer covered a mixed variety of topics from all onsite rounds. He extensively asked debugging questions this time. This round was the hardest one and lasts for around an hour.

Online Aptitude + tech round:

MCQ Questions from Quants, Logical reasoning and Verbal reasoning were asked. LR was easy, Verbal had been medium (people with good vocabulary can do well) and Quants was lengthy and bit hard. Test was camera proctored given on laptops. Overall level was easy. Tech questions included Coding debugging and missing code questions. Out of 7, 4 were of debugging and 3 codes needs to be completed out of given code function.

Tech Interview:

Interviewer started with my resume. He asked me about Web dev skills HTML CSS.

1. How can you make a text on webpage animate and move from one side to another?
2. Types of CSS.
3. Some question on event handling.

Then he moved on to my minor project

1. Explain your Minor 1 in detail.
2. What was your contribution in it.

Situation based question:

How can you deploy a system for automated parking as an ECE engineer?

Unix questions:

1. How to find a file starting with some prefix in your system?
2. Some pipelining question.

A simple Aptitude question of Distance and train.

A file handling C code to find no. Of occurrences of a word in it.

A code from my minor 2 ML project about dataset fetching and preprocessing.

A Mobile Communication and Networking problem.

HR round: Asked me to frame a story using water bottle . My favorite sports and it's fav player . His qualities which I would like and why?

Some talk about location and all.

Firstly there is online test which comprises of aptitude questions and 7 coding questions which basically are output and error removing questions

Then there is technical interview in which he was asking certain electronics questions as I am from ece basically on communication like modulation techniques and he also asked about projects and certain easy coding questions like write a function to get diagonal elements of a matrix and at last he asked me a question which out of league the question is what is cube of $(a+b+c)$.

Then there is HR interview he is very chill person basically asked about me , family, location preferences.

Kindly mention the round types (Aptitude/Coding/Technical/HR) in the response.

Round 1 - Aptitude

In this round there were questions based on data science, nodejs and 5-7 aptitude questions. Also there was 1 coding based question in which we have to write the code.

Round 2 - Technical Interview 1

In this round , 60 students were selected out of 500 students. And, they asked me What is OOPS concept. And then 5 properties including Encapsulation , inheritance , polymorphism . then they asked to tell them about the projects that I have made and they asked questions based on the skills that I have written on my resume.

Round 3 - Technical Interview 2

In this round only 20 students were selected and they go in depth of the projects that I have made. My projects were based on Web development. So they asked questions related to CSS and JAVASCRIPT.
