

Jaypee Institute of Information Technology, Noida

Minor Project-2

Even Semester, 2024

Progress Report-1/2

1. Group No.: 14

- 2. Group Members Name and Enrollment Number:**
- 1. Rahi Agarwal(9921103145)
 - 2. Ananya Shanker(9921103167)
 - 3. Arya Bagla (9921103169)
 - 4. Anshul(9921103176)

3. Supervisor: Dr. Shruti Gupta

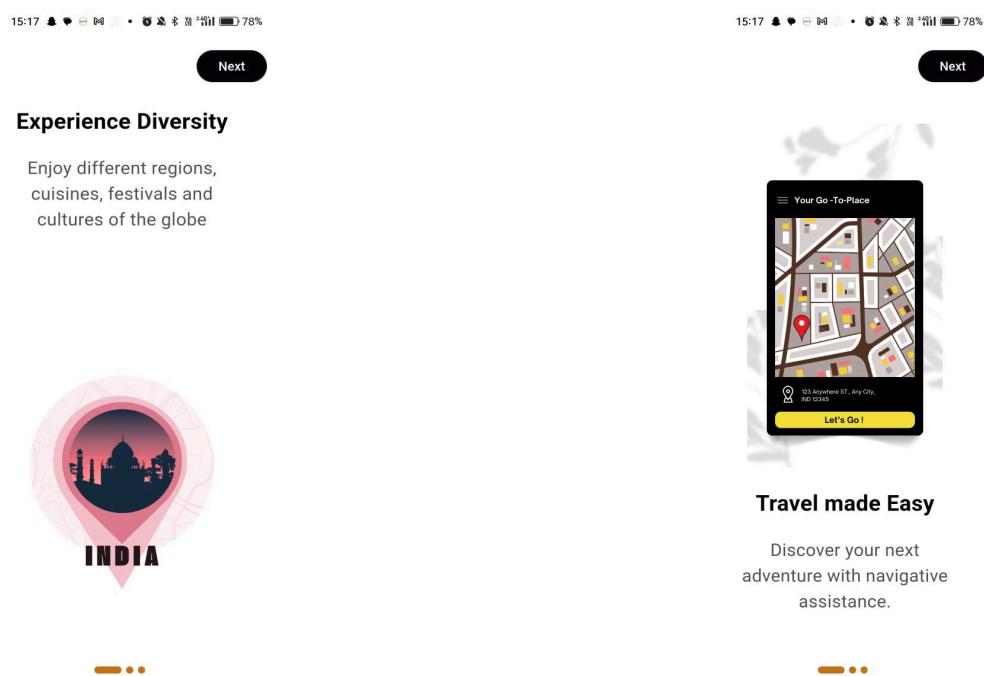

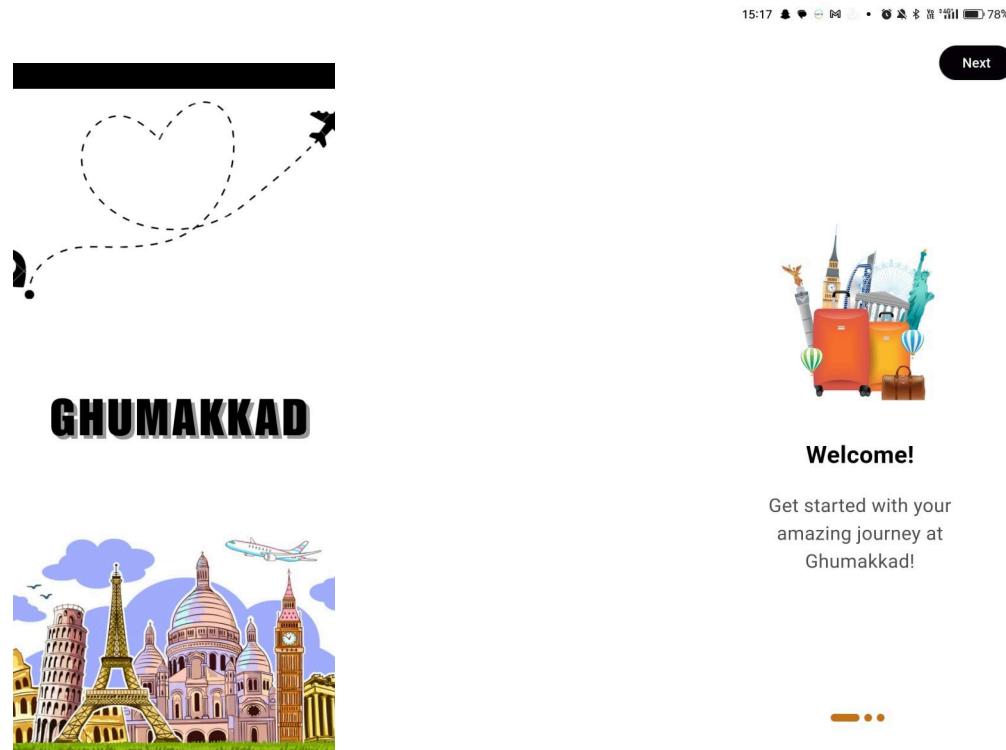

4. Title: GHUMAKAD-Discover Your Next Adventure with Ease!

5. Objectives in Points:

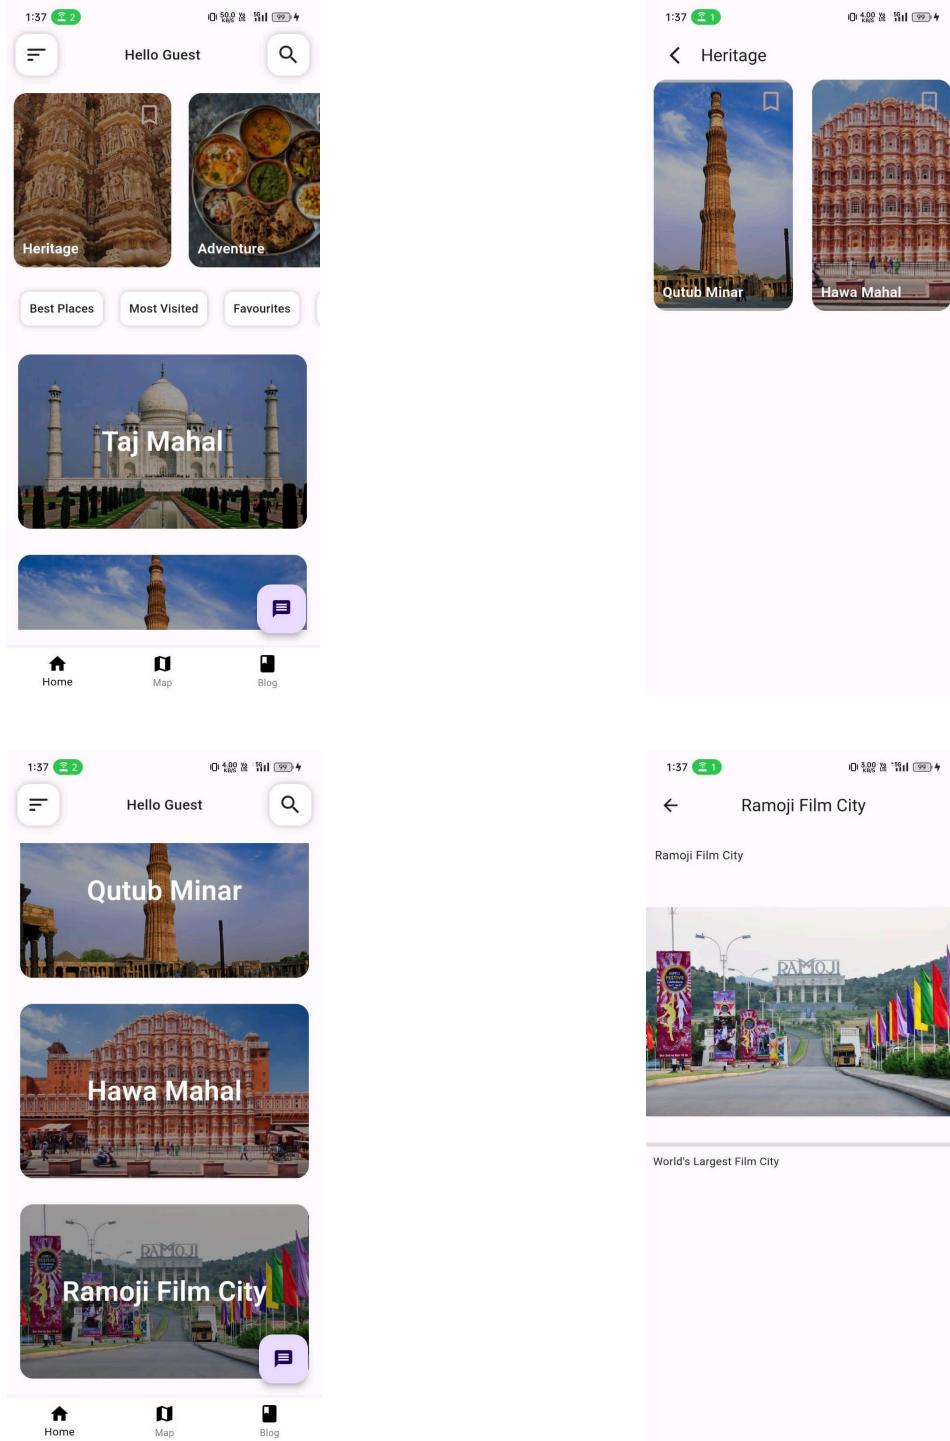

- 1. Promotion of Tourism: Encourage and provide comprehensive information both for domestic and international travelers to explore India's diverse cultural, historical, and natural heritage.
- 2. Showcasing India's Diversity: Highlight different regions, cuisines, festivals, and cultural practices to foster a sense of pride among Indians and attract international tourists.
- 3. Real-time Updates and Alerts: Keep travelers informed about safety updates, weather conditions, travel advisories, and special promotions or events to ensure a smooth and enjoyable travel experience.
- 4. Technological Innovation: Leverage Flutter technology to deliver a seamless and engaging user experience, making travel information accessible to a broad audience.
- 5. Information Accessibility: Bridge the existing information gap in travel guides by providing accurate and real-time insights into the cities travelers plan to explore

6. Work done:

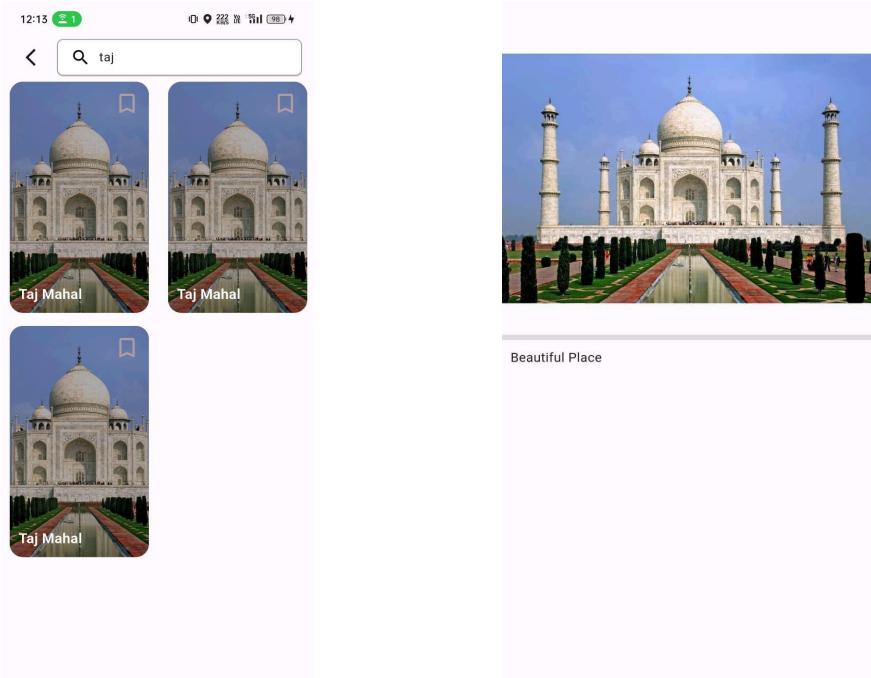

1. Getting Started with the app.

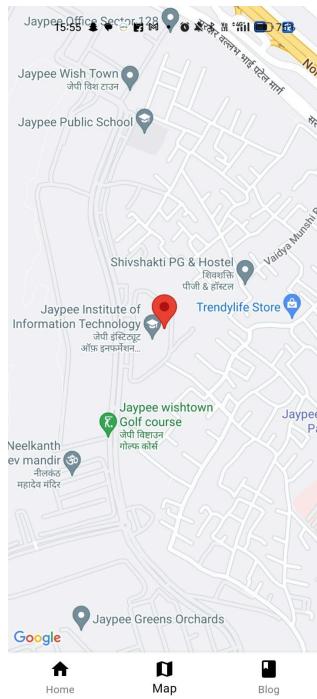

2. **Home Page** of the app that displays the places you can visit according to various parameters i.e Heritage, Adventure, Spiritual etc. It also displays the major tourist spots usually visited by people and gives their insights.

3. **Search-Filter option** that enables the user to search and get information about a place easily .

4. **Map Feature** which provides the current location of the user. Further in our ongoing implementation, we plan to integrate the facility to provide the nearest location a user wants to visit in different options of heritage,art.shopping across the country and also provide a 3-D visualization of the places that he wants to visit in near future.

5. **Ghumakkad-Blogs** that allows a local connection through the app. It enables various users to upload various places that he visited and found good and to be explored by others when they visit over or around that place giving a proper description of the place.

7. **Ghumakkad-Bot** that allows the user to get insights and real time assistance as well as it transfers the user to the human agent i.e the admin whenever the user feels he needs human intervention and assistance .
