### **Tutorial Sheet - Odd Semester 2022**

# 15B11Cl212 Theoretical Foundations of Computer Science

#### **Tutorial 1**

#### Instructions

- 1. Students are advised to come prepared in tutorial by revising the lectures of that particular week so that doubts related to topics covered in that week are resolved.
- 2. As tutorials will be purely problem solving based, always join the tutorial with a notebook and pen with you.
- 3. Whatever questions are discussed in tutorial, you are supposed to submit them on your respective classrooms every week.

# **Introduction to Discrete Mathematics and Set Theory**

#### 1. List the members of these sets.

```
a) \{x \mid x \text{ is a real number such that } x^2 = 1\}
b) \{x \mid x \text{ is a positive integer less than } 12\}
c) \{x \mid x \text{ is the square of an integer and } x < 100\}
d) \{x \mid x \text{ is an integer such that } x^2 = 2\}
```

2. Determine whether each of these pairs of sets are equal.

```
a) {1, 3, 3, 3, 5, 5, 5, 5, 5}, {5, 3, 1}
b) {{1}}, {1, {1}} c) Ø, {Ø}
```

3. Use a property to give a description of each of the following sets.

```
a) { a,e, i, o, u}
b) {1, 3,5, 7,9 }
```

4. Determine whether each of these statements is true or false.

```
a) 0 \in \emptyset
b) \emptyset \in \{0\}
c) \{0\} \subset \emptyset
d) \emptyset \subset \{0\}
e) \{0\} \in \{0\}
f) \{0\} \subset \{0\}
g) \{\emptyset\} \subseteq \{\emptyset\}
```

5. What is the cardinality of each of these sets?

```
a) {a}
b) {{a}}
c) {a, {a}}
d) {a, {a}, {a, {a}}}
```

6. How many elements does each of these sets have where a and b are distinct elements?

```
a) P(\{a, b, \{a, b\}\})
b) P(\{\emptyset, a, \{a\}, \{\{a\}\}\})
c) P(P(\emptyset))
```

7. What is the Cartesian product  $A \times B \times C$ , where A is the set of all airlines and B and C are both the set of all cities in the United States? Give an example of how this Cartesian product can be used.

- 8. State whether  $A \times B \times C$  and  $(A \times B) \times C$  are same or not. Explain your answer
- 9. Use a Venn diagram to illustrate the set of all months of the year whose names do not contain the letter R in the set of all months of the year.
- 10. Let A, B, C be three sets as shown in the following Venn diagram. For each of the following sets, draw a Venn diagram and shade the area representing the given set
- a)  $A \cup B \cup C$
- b)  $A \cap B \cap C$
- c)  $A \cup (B \cap C)$
- d)  $A (B \cap C)$
- e)  $A \cup (B \cap C)^c$
- 11. Using Venn Diagrams, verify the following identities
- a)  $A = (A \cap B) \cup (A B)$
- b) If A and B are finite sets,  $|A \cup B| = |A| + |B| |A \cap B|$
